

CLAIM AMENDMENTS

1. (currently amended) A house comprised of:

a plurality of modular units connected together;

a plurality of ~~prefabricated molded~~ exterior panels molded to replicate the look of a predetermined building material, each said exterior panel being a laminate comprising:

a ceramic-resin layer;

wherein at least one ~~prefabricated molded~~ exterior panel having predetermined openings for a door to enter said house;

~~at least one prefabricated molded exterior panel form molded with integral ornamental architectural features,~~ wherein at least one of said plurality of said exterior panels is mounted to at least one of said plurality of modular units.

2. (currently amended) A house according to claim 22 ~~[[1]]~~, wherein said ~~molded exterior panel is a vacuum-pressed molded exterior panel~~ gel coat layer comprises a ceramic filler.

3. (currently amended) A house according to claim 1, wherein a said ~~molded~~ exterior panel ~~[[is]]~~ additionally comprises ~~comprised of at least one layer of~~ a ceramic-resin layer material deposited in a grid like pattern of intersecting lines of ceramic-resin material.

4. (currently amended) A house according to claim 1, further comprising:

~~foam insulation injected into an area formed between a~~ said molded exterior panel and a said frame-structure modular unit.

5. (currently amended) A house according to claim 1, wherein a said molded exterior panel is a unitary wall unit attached to one of said modular units.

6. (currently amended) A house according to claim 1, wherein a said molded exterior panel is formed from an inert fire-resistant material.

7. (currently amended) A house according to claim 6, wherein a said modular unit comprises a frame built units-are-comprised-of frames from steel members.

8. (currently amended) A house according to claim 1, wherein a said ornamental architectural features-are-columns exterior panel additionally comprises a resin-fiberglass layer deposited in a grid like pattern of intersecting lines of resin-fiberglass material.

Claim 9 (cancelled).

10. (currently amended) A house according to claim 1, further comprising comprised-of:
a modular roof frame connected to ~~either~~ at least one said modular unit ~~[[units]]~~.

11. (currently amended) A house according to claim 10, further comprising ~~comprised~~
of:

a ~~form-molded~~ roof panel ~~formed to replicate predetermined roofing material~~
being a laminate comprising: a gel coat layer, a ceramic-resin layer in contact
with said gel coat layer; and a resin-fiberglass layer; wherein said roof panel is
attached to said modular roof frame.

Claims 12 - 20 (cancelled).

21. (New) A house according to claim 1, wherein a said exterior panel additionally
comprises a resin-fiberglass layer.

22. (New) A house according to claim 1, wherein a said exterior panel additionally
comprises a gel coat layer.

23. (New) A house according to claim 22, wherein said gel coat layer is in contact with
said ceramic-resin layer.
